

Rice Cooker with Stainless Steel Pot MMRCS10

RICE COOKER

Please read this instruction manual thoroughly before operating and keep it for future reference

IMPORTANT SAFETY INSTRUCTIONS

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Misuse of appliance may cause potential injury.
- Do not reform or repair or disassemble the appliance, as this may risk of fire, electric shock and injury.
- Keep the appliance away from combustibles. During operation, keep away from curtains, drapes, curtain or in similar articles to avoid the risk of fire.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions, or has been dropped or damaged in any manner. If the power cord is damaged, it must be replaced by the Service Centre to avoid a hazard.
- When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and/or injury.
- The plug should be fully inserted into the socket to avoid the risk of fire, electric shock, and short circuit.
- Do not unplug the appliance by pulling on the cord.
- Use the accessories from the appliance only, as other accessories not from the appliance may cause fire, electric shock or injury.
- Please turn off and unplug the appliance before cleaning, maintenance or relocation and whenever it is not in use.
- Unwind the power cord fully before use.
- If the power line is too short, use an extension socket for connection. Please do not use poor-quality socket. The power consumption of the appliances must not exceed the maximum load of the extension plug.
- Clean any dust and water on both ends of the power line and the socket of the appliance to avoid the risk of fire, electric shock and short circuit.
- Avoid spillage on the connector.
- Do not immerse appliance, cord or plug in water or other liquid.
- Extreme caution must be used when moving the appliance containing hot oil or hot liquids.
- Do not use the appliance for food that may cause vent clogging: food in sheets (e.g. laver and Chinese cabbage), food in bands (e.g. kelp), food in pieces (e.g. corn dregs), to avoid accident and damage to the appliance.
- During operation, do not place your hands or face close to the steam valve which may cause burns.
- During operation, do not cover the steam valve with cloth or other articles which may cause accidents and damage to the appliance.

- Do not place anything on top of the appliance.
- Be extremely cautious of steam when opening the lid.
- Please regularly clean the steam valve.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Place the appliance on a flat and heat-resistant surface, and use it in a well-ventilated area.
- Do not expose the rice cooker to water, humid conditions, or heat sources.
- This appliance can only be used with the given inner pot to avoid overheating and anomaly.
- To prevent damage or deformation, do not use the cooking bowl on a stovetop or burner.
- Do not drop the inner cooking pot to avoid deformation.
- Do not impact the inner cooking pot with hard materials to avoid deformation.
- Before operation, check whether the inner cooking pot and steam valve are in place to avoid accident.
- Before operation, clean any foreign materials outside the inner cooking pot including water droplets and rice to avoid overheating and short circuit.
- Always make sure the outside of the cooking bowl is dry before use. If the cooking pot is wet when placed back into the appliance, it may damage or malfunction.
- The rice should not be left in the keep warm function on for more than 12 hours.
- While inner pot is not placed in rice cooker, the switch will not engage. Do not engage or press by force.

Note:

- If inner pot is not sitting properly on the heating element, the switch cannot be engaged.

- When appliance is operating or just finished, do not directly touch the inner cooking pot as it may cause burns.
- The heating element surface is subjected to residual heat after use, do not touch.
- When in use, it is normal that the appliance slightly ticks or fizzes. Please do not panic.
- This appliance is intended to be used in household and similar applications such as:
 - Staff kitchen areas in shops, office and other working environments;
 - Farm houses;
 - By clients in hotels, motels and other residential type environments;
 - Bed and breakfast type of environments

PRODUCT TECHNICAL PARAMETERS

MODEL	RATED VOLTAGE	RATED POWER	GROSS CAPACITY	RICE CAPACITY
MMRCS10	220-240V~, 50-60Hz	400W	2L	1L (Maximum 5 Cups)

INTRODUCTION OF PARTS

Accessories:

Rice Spatula

Measuring Cup

Steam Rack

Power Cord

Control Panel

CONTROLS AND OPERATIONS

Measuring the rice

Use the measuring cup which comes with the appliance to measure and take the correct amount of rice (when measuring rice, 1 cup = a flat cup, more or less rice will affect the effect of cooking rice). The ratio of raw rice to water is 1:1.

Taking the proportionate amount of water

Using the measuring mark provided on the inner cooking pot. For example, if you are cooking 4 cups of rice, put the washed rice into the inner cooking pot first. Then add water to the scale mark of "4" under the label "Cup", which is indicated on the inside of the inner cooking pot. The maximum rice capacity is 5 cups of rice; the minimum rice capacity is 2 cups of rice.

Note: Depending on your personal preferences and the different type of rice use, the amount of water added can be adjusted accordingly.

To cook rice

1. Measure the amount of rice needed with the measuring cup provided. Wash the rice in a separate bowl to avoid damage to the inner cooking pot.
2. Put the washed rice into the inner cooking pot and add water. Please refer to "Measuring the rice" and "Taking the proportionate amount of water".
3. Clean and dry the outer surface of the inner cooking pot, place it into the rice cooker.

4. Turn the inner cooking pot gently left and right to align the inner cooking pot correctly on top of the heating element.

Note: If inner cooking pot is not placed properly, cooking will be affected.

5. Close the lid until a "click" sound is heard.

6. Plug in the cord set to the appliance inlet. Connect to the electrical outlet and switch on power supply. When powered on, the indicator light for "KEEP WARM" will be illuminated in orange.

- 7.
8. Press down the power switch to start cooking. The "COOK" indicator will light up in red. When the rice is cooked, the cooker will automatically switch to the keep warm function and the "KEEP WARM" indicator will light up in orange. The appliance will stay in keep warm until the power supply is switched off.

Note: For better cooking results, it is recommended that the keep warm function be allowed to continue for about 15 minutes before opening the lid or starting to scoop out the rice.

9. After cooking is completed and keep warm is no longer needed, turn off the main switch and unplug the power cord.

Note:

- It is normal for the rice to stick onto the inner pot after it is cooked. You may refer to cleaning and maintenance on how to clean the inner pot.
- It is normal to have scorched / burnt rice in the inner pot after it is cooked. You may refer to cleaning and maintenance on how to clean the inner pot.
- The appliance will not function when the inner cooking pot is not placed inside the appliance.
- Keep the base of the inner cooking pot and the heater surface clean and dry at all times. Foreign objects located between inner cooking pot and heater surface will cause the appliance to malfunction.
- Do not force to turn on the appliance. If it is difficult to engage the power switch, check for incorrect placement of the inner cooking pot or if there are foreign objects on the heating plate.
- It is recommended not to use the keep warm function for more than 4 hours. Whilst the appliance will not be damaged, the rice will become discolored and a burnt smell may be detected.

To steam

1. Pour sufficient water into the inner cooking pot.
Note: Add minimum amount of water to the scale mark of "2" under the label "Cup", which is indicated on the inside of the inner cooking pot.
2. Put the steam rack with food onto the inner cooking pot.
3. The steaming time will differ based on the quantity and type of food.
4. Steaming time can be extended by adding more water.
5. Alternatively, food steaming can be done together with cooking rice. refer to "Measuring the rice" and "Taking the proportionate amount of water".

CLEANING AND MAINTENANCE

- Disconnect the power supply and allow the appliance to cool down.
- Use soft and gentle damp cloth to clean the outer body.
- Remove the inner cooking pot, clean with dish the inner cooking pot, clean with dish washing detergent or soft cleaning agent. Do not use metal scouring sponge, abrasive material, or corrosive chemical detergent for the cleaning of the appliances. Always use a soft and gentle sponge for cleaning.
- It is normal for rice to scorch and stick to the bottom of the stainless steel pot. It is recommended to pre-soak the inner pot in warm, soapy water for about 15-30 minutes to help loosen stuck-on food residues.
- Dry it thoroughly with a soft cloth to prevent water spots and maintains the pot's appearance.
- To remove built-up mineral deposits on the stainless steel surface, you can use a stainless steel cleaner or a mixture of vinegar or lemon juice and water to polish and restore the shine. Apply the solution with a soft cloth, rub gently, then rinse and dry.
- Stainless steel may occasionally take on a bluish or rainbow-like discoloration due to heat, but this does not affect the pot's functionality.
- Grains of rice and other foreign objects may stick on to the heating element of the appliance. These stains must be polished away using soft damp cloth. By doing so, the clean and dry contact area between the heating element and the bottom of the inner cooking pot will improve the cooking performance.
- Check the condensation collector frequently and pour out any water found inside. Wash under a running tap and replace it on the appliance.
- Detach the stainless steel inner lid to wash it regularly and ensure it is thoroughly dry before putting it back on the lid.
- Pull upward the steam valve while slightly turning left and right or push it out from the inner side of the lid. Wash the steam valve regularly and clean it dry before putting it back into the lid.
